

# Embedded CTO Services

Your CTO inside your business

[fractionalcto.io](https://fractionalcto.io)

---

## What an Embedded CTO means

An Embedded CTO works directly with your leaders and delivery teams. You get senior technology guidance and decision making day to day, plus the sleeves rolled up support that keeps programmes moving.

The aim is simple. Better direction, cleaner execution, fewer surprises.

- Shape Architecture & Standards
- Drive Delivery Rhythm
- Resolve Blockers
- Mentor Technical Leads

## How Embedded Engagement Works

- 1 Initial Assessment**  
We assess your current state, team capability, delivery pipeline, and immediate priorities.
- 2 Immersion & Alignment**  
We integrate with your teams, set up governance rhythms, and establish clear delivery cadence.
- 3 Active Leadership**  
We work alongside your teams providing architecture guidance, unblocking issues, and ensuring quality.
- 4 Capability Building**  
We strengthen internal capabilities through mentoring and knowledge transfer.

## Tangible Outcomes

- Improved delivery predictability
- Stronger architecture and technical standards
- Reduced technical debt accumulation
- Better team capability and confidence
- Clear accountability for technology decisions

## Investment Levels

### Part-Time Support From £4,000/month

Two days per week embedded leadership

- Architecture reviews
- Weekly team engagement
- Technical decision support

### Core Leadership From £7,500/month

Three to four days per week active CTO

- Daily team presence
- Sprint and stand-up participation
- Active delivery oversight

### Full CTO Presence From £12,000/month

Full-time equivalent embedded CTO

- Complete CTO responsibility
- Strategic and delivery leadership
- Team building and recruitment

## What Clients Say

"Technically brilliant. Without his guiding hand, our major programme simply wouldn't have happened. I recommend him without question."

— Tim Carter, Change & Transformation Leader

"Richard quickly understood our complex systems and provided pragmatic solutions that balanced technical excellence with business needs."

— Sarah Johnson, Head of Engineering
